TENSION CLAMP TD-TC05 (PA6+Stainless Steel)

Description

The wire clamp consists of two parts: stainless steel 201 or 304 material retractor and reinforced nylon material body. When we produce nylon material, we can make material formula according to customer's tension requirements. We can reach 0.5-1.5kN for all kinds of tension requirements. Metal hook We also have special shape design to meet the different use environment of customers. The product is mainly used in FTTH butterfly cable, which has very strong tensile force and good corrosion resistance and high temperature resistance and high toughness. We will provide you with the most professional product performance support to meet your requirements.

Features

- 1.Strong UV protection
- 2.High corrosion resistance
- 3.Flexible tension choice of 0.5-1.5kN
- 4.Metal hook Available in various shapes

Configuration

Model	Size	Material	Apply Cable diameter	Weight	Breaking load	Warranty Time
TD-TC05	11*3.5*2 cm	Pa6+SS	2-5 mm	36 g	0.8 KN	10 year

Packaging information

- 1: Outside the carton Size: 40X30X30 CM
- 2: Outside the carton weight: 16 KG
- 3: Each box number: 400 PCS
- 4: Every small bag: 50 PCS
