

# FICHA TÉCNICA

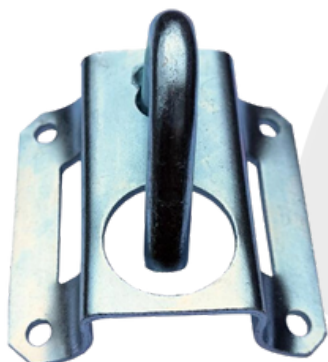

## TD-YK01

### Production description

The product uses high carbon steel material as the main body. Through precision punching machine continuous stamping forming, it will achieve product stamping accuracy and appearance pressing unified. Hook use large diameter stainless iron bar single stamping molding and Automatic electric welding with bottom fixation, solid and durable. A variety of materials can be selected for electroplating, such as blue zinc, white zinc, dacromet, etc., to ensure the protection of the product body in the field environment, increase of service life and improve the product beauty.

### Product Characteristics

1. high tensile strength and stability
2. Thickened draw hook diameter
3. thickness of Thickened base is 2.2mm
4. Plating optional
5. durable service

### Product configuration

| Model   | Size        | Material               | Weight | Breaking load | Useful year |
|---------|-------------|------------------------|--------|---------------|-------------|
| TD-YK01 | 65*65*55 mm | cold-roll steel sheets | 120 g  | 1.6 KN        | 10 year     |

### Packing information

- 1: Carton size: 53x29x19 CM
- 2: Total weight: 26.5 KG
- 3: Quantity: 200 PCS/carton
